Automation Explorer Primary Goal of **SKILL-A-THON** for educators 2024

Raise Awareness:	Increase awareness among department members about the importance of automation literacy in today's workforce. Highlight the benefits of automation skills for career advancement, job performance, and organizational success.
Streamlining Administrative Tasks:	Automation skills enable educators to automate repetitive administrative tasks such as grading assignments, managing student data, and scheduling. By automating these tasks, educators can save time and focus more on teaching and student engagement.
Preparing Students for the Future Workforce:	By learning automation skills, educators can better prepare students for the demands of the future workforce. They can teach students essential digital literacy skills, expose them to automation technologies used in various industries, and equip them with skills that are increasingly in demand in the job market.
Professional Development and Career Advancement:	Acquiring automation skills enhances educators' professional development and opens up new career opportunities. Educators with automation skills are highly sought after in educational institutions, training organizations, and ed-tech companies, and they can advance their careers by taking on leadership roles in educational technology and innovation.
Contributing to Educational Research and Innovation:	Automation skills enable educators to contribute to educational research and innovation. They can leverage automation tools to collect and analyze data, conduct experiments, and develop innovative teaching strategies that advance the field of education.

Evolution of Digital Automation

What is Robotic Process Automation (RPA)

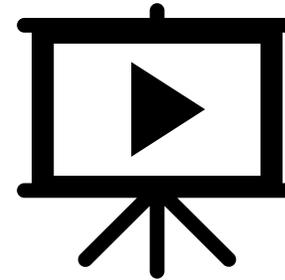

What is robotic process automation?

Robotic process automation (RPA) is a software technology that makes it easy to build, deploy, and manage software robots that emulate humans actions interacting with digital systems and software. Just like people, software robots can do things like understand what's on a screen, complete the right keystrokes, navigate systems, identify and extract data, and perform a wide range of defined actions. But software robots can do it faster and more consistently than people, without the need to get up and stretch or take a coffee break.

What are the business benefits of RPA?

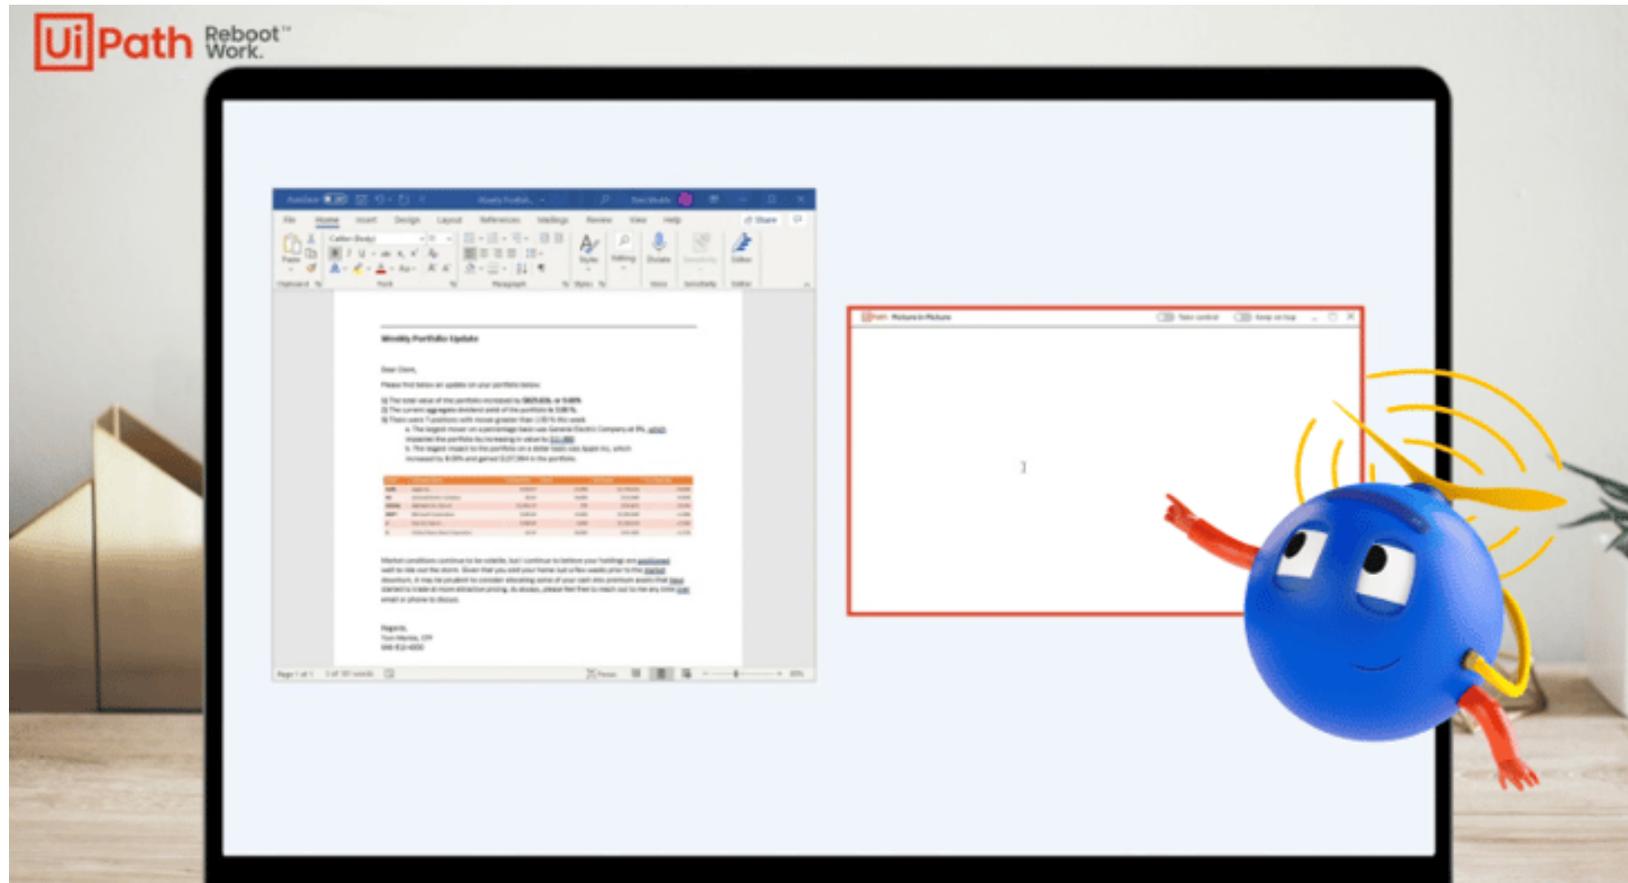

Robotic process automation streamlines workflows, which makes organizations more profitable, flexible, and responsive. It also increases employee satisfaction, engagement, and productivity by removing mundane tasks from their workdays.

RPA is noninvasive and can be rapidly implemented to accelerate digital transformation. And it's ideal for automating workflows that involve legacy systems that lack APIs, virtual desktop infrastructures (VDIs), or database access.

Here's an example of a software robot hard at work reading and evaluating resumes via <https://www.youtube.com/watch?v=2qqW7HlqIU>

Release date: 27 October 2022

What's New

Support for global variables and constants

It is now easier to reuse data globally within a project:

- You can now set a global scope for variables and use them throughout a project. This makes it possible to reference the same variable in multiple workflows without having to use an argument and pass it to each workflow.
- We've introduced constants which enable you to define global fixed values that do not change during project execution.

Find out how to create global variables and constants from the [Data Manager](#).

New design for activities

Activities have a new design and an improved user experience. We've introduced new controls, editors, and builders for the most common data types, making it easier to configure activities without writing expressions. All activity properties are now available in the activity cards in the workflow designer and users no longer need to use the Properties panel to configure advanced properties. This simplifies the

Automation Explorer
SKILL-A-THON
2024

Receive learning path completion certificate

Educator Journey – SKILL-A-THON 2024

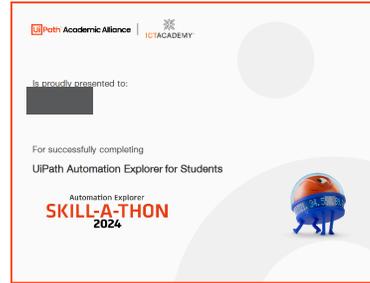

All Educators should enrol in the [Automation Explorer Learning plan](#) to participate in Skillathon 2024.

Claim the Automation Explorer badge

1. Upon Completion of the Skillathon learning plan & having received the Diploma of Completion (Skillathon 2024), please enrol for <https://academy.uipath.com/learning-plans/automation-explorer>
2. As you have already completed all the modules, the learning plan may ask for a quiz or issue completion certification.
3. Download the completion certificate and await the email for the badge (or look for the same under the achievements tab on my dashboard at <https://academy.uipath.com/activity-dashboard>)

UiPath Automation Explorer 2024 Badge

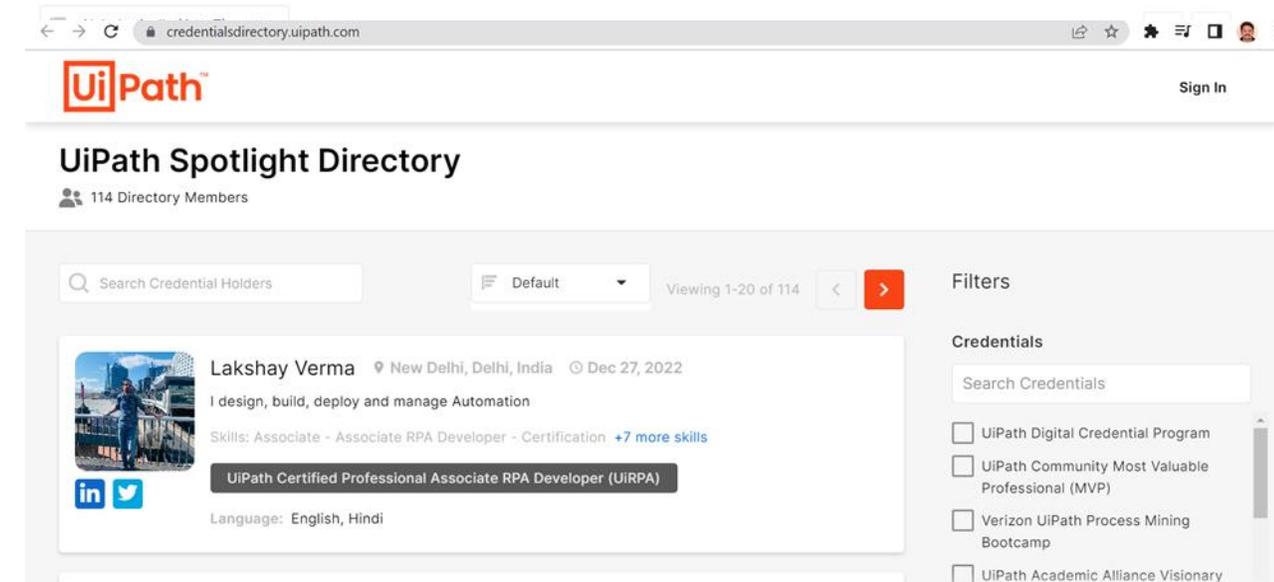

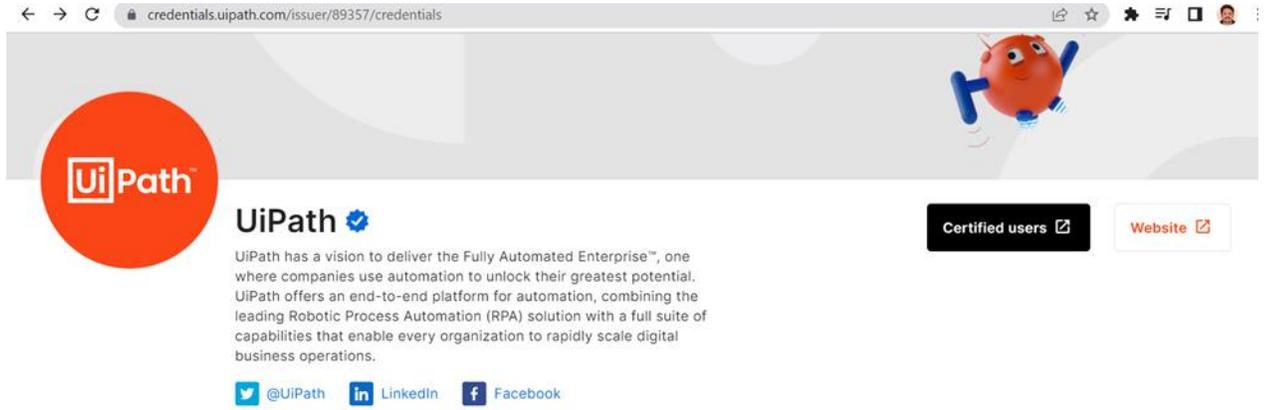

SAMPLE
BADGE*

You will receive a verifiable **UiPath Automation Explorer** badge issued through the UiPath Credential platform and listed on the UiPath Credential Directory.

UiPath Credential - <https://credentials.uipath.com/>
Directory - <https://credentialdirectory.uipath.com>

* Designs may change subject to approvals

Follow your institution progress on #UiPathSkillathon2024 using the Leaderboard.

Recognitions – Educators Challenge

Top-performing institutions and Single Points of Contact (SPOCs) will receive special recognition for their outstanding contributions and achievements in the Skill-A-Thon.

- At the national level, the top three institutions/SPOCs will be recognized based on the number of educators registered and completing the learning paths in the Skill-A-Thon
- All SPOCs achieving 100% coverage shall be recognized for their significant accomplishment in the Skill-A-Thon
- Special recognition – For all institutions driving 100% completion of from department staff will be adjudged – Automation Ready College / School / Department for the year 2024 - 25 by UiPath

Important Notes

1. Please ensure educators use same email to register on the ICT Academy and UiPath Academy portal
2. For Skillathon, please use only - <https://academy.uipath.com/learning-plans/uipath-automation-explorer-for-educators>
3. Feel free to share videos on how you used automation to help ease your day-to-day, and don't forget to tag and use #UiPathSkillathon2024 tags (as in the next slide)
4. Don't forget to join us for - live bot-building & tech sessions with industry professionals (Every Friday, details to be shared by the ICT Academy team)
5. Stay connected with UiPath Academic Alliance efforts via <https://whatsapp.com/channel/0029VaG3I6aEAKWJRQfbVK1I>
